Spectrum Books Consider a Range of Views

With the publication of The Meaning of the Millennium in 1977, InterVarsity Press launched the first of its many “multiple views” books, now known collectively as the Spectrum series. These Spectrum Multiview Books from IVP Academic offer a range of viewpoints on academic topics about which Christians clearly disagree. In each book, proponents of major positions have an opportunity to make their case, with each of the other contributors offering a brief response. Books in the series range in topic from theology to science, from practical ministry to philosophy.

Recent titles in the series include:

**Faith and Reason: Three Views**
